Courses Registration

عربي

Notes

- Dear students: Please be notified that this website is the only official website for registration, and that the university is not responsible for any other website for students' registration.
- The synchronous course does not appear within the available courses in case the student hasn't studied the original course or has registered for it in the same registration semester. A student who wants to register two synchronous courses must first register for the original (theoretical) course during the course registration process, so that the system allows him/ her to register the synchronous (practical) course.
- You must comply fully to the courses of your study plan issued by your department.
- You should always refer to the instructions in the Student Handbook and adhere to them.
- If there is any problem in the process of course registration, please check with your registrar (in the Admission and Registration Unit) and your mentor (in your department / college).
